

CHEMICAL HANDLING

- ◆ The SDS (Safety Data Sheet) will have more detailed information on hazards and handling precautions.
- ◆ Read the label on the chemical to determine hazards.
- ◆ Determine how to guard against flammability.
Is the smoke from that chemical fire toxic?
- ◆ You must know the physical hazards of the chemical you will be handling.
- ◆ Does the chemical fume natively?
Are the fumes toxic?
Are the fumes flammable?
- ◆ You need to know if the chemical reacts with other chemicals and if hazardous products are then emitted.
